~~Crash Investigation 2~~

~~Frankfort Police Department
20602 Lincoln Way Lane, Frankfort, IL 60423
Monday - Friday, April 23 - May 4, 2018
8:00 am till 4:00 pm~~

This course complies with the guidelines of the following mandate(s):

Civil Rights | Law Updates | Constitutional & Proper Use of LE Authority | Lead Homicide Investigator

Course Description: At scene traffic crash data collection is useful only if all appropriate information is collected and properly interpreted and analyzed. Participation in Crash Investigation 2 enhances the capability and credibility of the at-scene investigator.

Crash Investigation 2, based on the 2014 edition of J. Stannard Baker's world-renowned textbook Traffic Crash Investigation, emphasizes vehicle behavior in crashes, vehicle damage analysis and more advanced mapping and evidence location skills.

Crash Investigation 2 builds upon topics examined in Crash Investigation 1 and provides the student/investigator with greater knowledge of the information available at the crash scene and how to properly collect and initiate interpretation of that information.

The course also provides instruction in the use of laser-based measurement devices to measure crash scenes and the evidence found there. Laser Technology, Inc. units are used for these demonstrations. Downloading the electronic information into mapping programs is also covered.

Course Topics:

- Vehicle damage analysis - description, reporting and determination of direction of forces
- Vehicle behavior in crashes
- Results of the crash on the road - identifying and interpreting tire marks and road scars
- Lamp filament analysis - determining whether headlamps, tail lights and turn signals were on or off at moment of impact
- Tire damage analysis - role of tire failure
- Measurement methods - perspective grid, photogrammetry, measurement techniques, diagram drawing and systematic methods for organizing and illustrating data
- Interpretation of data - use of all information obtained through investigation
- Specialized data gathering - measuring devices and other testing
- Laser-based measurement and use of mapping software
- In addition to addressing how the latest generation of vehicle electronics - including data recorders, traction and stability controls, multiple airbags - affect both the crash and the crash investigation, specific new topics include:
 - hit-and-run investigations,
 - dealing with event data recorders
 - technical report writing and other emerging technologies

Continued on next page:

Course Materials: All students need to bring a laptop computer or other device with a USB port to the class. Student reference materials will be distributed in USB flash drives (files will accept electronic comments and highlighting and can be saved).

In all cases, please bring the following additional items to class:

- Comfortable outdoor clothing (likely to get dirty) for Week 2 outdoor projects
- Small pair of scissors
- Simple calculator with square root key
- Staedtler Geometry Compass
- Mechanical Pencils
- Triangles 45-45-90 and 30-60-90
- Laptop computer (or other device) with USB port(s) and Adobe Reader installed
- **Traffic Crash Investigation, 11th Edition – All Crash Investigation 1 students receive a copy of the text. If necessary, a copy may be purchased online at nucps.northwestern.edu/crashbooks.**
- Students may use calculators and electronic communication devices in class; however, possession/use of electronic communication devices during closed-book quizzes and exams is prohibited.

Who Should Attend:

- Crash Investigation 2 is designed for those who analyze data collected by other crash investigators and who gather and analyze supplementary data.
- Crash Investigation 2 participants must have successfully completed NUCPS's Crash Investigation 1 or its equivalent

Course Outcomes: Officers/investigators who successfully complete Crash Investigation 2 develop skills in technically preparing crash investigation data and collecting follow-up data required by prosecutors, defense attorneys, claim adjusters, fleet supervisors, reconstructionists and highway safety engineers.

Instructor (s): Course instructor(s) are provided by *NUCPS*.

Comprehensive DUI Awareness

New Lenox Police Department

200 Veterans Parkway, New Lenox, IL 60451

Friday; May 4, 2018

8:00 am till 4:00 pm

This course complies with the guidelines of the following mandate(s):
Civil Rights | Constitutional & Proper Use of LE Authority | Law Updates

Course Description: This new program will provide students with a comprehensive overview of DUI enforcement and a summary of all impaired driving curricula developed by the National Highway Traffic Safety Administration (NHTSA), which will assist them in determining if they require or desire future DUI training. Emphasis will be placed on the tenets of DUI enforcement not covered in basic training. Officers will also be provided with the genesis and motivation for techniques, procedures, and law currently used in DUI enforcement.

Pharmacology and physiology will be discussed in order to enhance officers' knowledge of the effects of alcohol/drugs on the human body. Eye examinations will focus on the dynamics of pupillary reaction to stimuli related to possible impairment caused by alcohol/drugs.

This course will not train officers in field testing per se, but will review common mistakes made by officers when conducting such tests, thus enabling officers to avoid future defense challenges. This course will emphasize the eight implied consent warnings and the statutory elements required for enforcement. The final portion of the program will focus on the chemical testing of breath, blood, and urine. Relevant court cases will be highlighted throughout the training.

Topics to be addressed include:

- Review of NHTSA curricula
- Pharmacology and physiology of alcohol on the human body and pharmacokinetics utilizing Widmark's formulas
- Retrograde extrapolation
- The three phases of the DUI process as described by NHTSA
- Common errors associated with Standardized Field Sobriety tests (SFST's) and other non-standardized tests
- Eye exams conducted during DUI encounters and the pupillary dynamics of possible alcohol and/or drug impairment
- Approved Preliminary Breath Test instruments that have automatic sampling/self-diagnostics and the administrative rules governing their use
- The 8 Implied Consent Warnings and the statutory elements associated with their use
- Evidential chemical tests an officer may request after a DUI arrest and the administrative rules associated with each test

Instructor: Tony Lebron (Retired M/Sgt; Illinois State Police) will be the instructor.

~~Station 3 Training Center, Frankfort Fire Protection District~~

~~24420 S. LaGrange Rd. (Rt. 45), Frankfort, IL 60423~~

~~Monday, May 7, 2018~~

~~8:00 am till 4:00 pm~~

This course complies with the guidelines of the following mandate(s):

Use of Force

Course Description: Recent events have placed local, police officers at risk from not only everyday encounters with traffic violators, but also with suspected terrorists and domestic groups intent on killing patrol officers. Vehicle stops are one of the most hazardous duties performed by police officers; no two traffic stops are ever the same. This one day, scenario-based seminar is designed to teach officers the tactical tactics for making traffic stops from positions of advantage and safety.

Officers will learn to recognize and respond to the presence of IEDs in vehicles and on subjects. This block will include both classroom and scenario activities. Officers will review Department of Homeland Security protocols for local department contact with suspected and known terrorists, as well as scene safety and personnel safety protocols. Officers will examine their role as local agencies in the Joint Terrorism Task Force (JTTF) network. The scenarios will include IED mockups and hostage situations

Participants will actively participate as both officers **and** subjects/offenders in the scenarios. Officers will use and encounter handguns and long guns. Role players will also have IEDs, Meth lab equipment, WMDs, and other contraband items. Officers will find clues to possible criminal and terrorist activity. The scenarios are real-time, and can rapidly accelerate, based on the officer's control (or lack of control) of the encounter. **Command Presence** will be emphasized as a tool for safety and maintaining control of subjects during traffic stops.

*This class is a soft air, weapons training course. **Officers need to bring their duty belts and should have their department vehicles (not required) for scenarios. Officers are encouraged to have either sweatshirts or long sleeve shirts available to wear. Face protection and Air Soft® type weapons will be issued at the training site.***

The Instructors: The lead instructor is Michael Drumm. All instructors are certified, full-time police officers, and are members of the Illinois Tactical Officers Association and the International Law Enforcement Educators and Trainers Association. Drumm is also a DHS contract instructor.

Illinois General Explosives Recognition and Requirements

JJC, Weitendorf Agricultural Center
17840 W. Laraway Rd, Joliet, IL 60433
Friday, May 18, 2018
8:00 am till 4:00 pm

GPS alert: use 1151 East Laraway Road 60433, neighbor of Ag. Center

This course complies with the guidelines of the following mandate(s): Law Updates

Course Description: This is a one day 8-hour class being provided by the Illinois Department of Natural Resources, OMM-Explosives and Agg. Division. The class will provide hands on education for recognizing the different types of high/low explosives and their requirements at both the State of Illinois level, as well as the BATFE (Federal) level. In addition to general explosive recognition, the specifics and differences of consumer fireworks (1.4) vs. professional grade fireworks (1.3G) and the laws that pertain to them will be discussed in great detail.

This class is being provided by the IDNR to help educate law enforcement and to provide direct assistance, on scene, when dealing with explosive situations. The IDNR regulates / investigates high and low explosives including 1.1, 1.2, 1.3, and 1.5. Too many times law enforcement does not have the education to know how to identify an explosive and/or if a bomb squad needs to be called. Bomb Squads, Explosives Breaching SWAT Teams, and BOMB Dog Handlers already possess the IL Individual Explosives License. The IDNR must be notified immediately upon any recovery of a regulated explosive and/or device to pursue the information necessary for enforcement.

If the Officer and their respective department so desire; after completing the class and passing the exam they can receive an IL IDNR Individual Explosives License, to be used in association with their law enforcement duties. A random monthly bank of test questions will administered at the end of the class which will consist of 50 questions that will be multiple choice and/or True-False. Each officer receiving the license will fill out an application and must pass the test with an 80% or higher. Officers who do not pass the test will be provided an opportunity to retest in the near future.

➤ **Licensing is recommended but not required to attend.**

There are eight chapters covered in the presentation and each officer will be provided a packet of information from the IDNR consisting of a copy of the IL Explosives Act, the Admin Codes that Apply to the Act, a general explosives safety packet, a packet for note taking as the presentation is given, and a small 4-page packet for officers to keep available as a quick reference guide for explosive identification purposes, while on duty.

Continued on next page:

Key topical areas to be addressed include the following:

- Illinois Explosives Act
- Explosive Storage Requirements-Law Enforcement and Non-Law Enforcement
- Explosives Safety/Recognition/Handling (m-devices, homemade sticks, etc.)
- Fireworks- 1.3G low explosives (professional fireworks) vs 1.4 low explosives
- Enforcement of 1.3G vs. 1.4 and their requirements

Instructor:

The instructor for this class is Nick Sterling who currently is a Specialist/Inspector/Investigator for the Illinois Department of Natural Resources, OMM-Explosives and Agg. Division. Mr. Sterling's current territory includes Cook, Lake, McHenry, DuPage, Kane, Kendall, Gundy, and Will Counties. Sterling has been with the Department for four years and inspects/investigates all explosive storage facilities (Law enforcement and Non-Law Enforcement), explosives accidents, explosives incidents, and performs random checks/investigations on both licensed and unlicensed individuals. Sterling has 18 years of high explosives experience and teaches the IL Individual Explosives License Class on a regular basis. Over the past few years Mr. Sterling has noticed a lack of education when law enforcement agencies are dealing with explosives related issues, and hopes to help prevent these issues in the future through education and assistance.

Crisis Intervention Team Training (CIT)

40-Hour State Certified Course

Plainfield Fire Protection District (Headquarters)

23748 W. 135th Street; Plainfield, IL 60544

Monday - Friday, May 21 – 25, 2018

8:00 am till 4:00 pm

This course complies with the guidelines of the following mandate(s): Civil Rights | Constitutional & Proper Use of LE Authority | Cultural Competency | Human Rights | Legal Updates | Procedural Justice | Introductory Mental Health Awareness

Purpose: Law enforcement officers are generally the first responders to crisis events. This course is also open to local and county sworn corrections officers. It is important to have individuals in law enforcement who can utilize effective strategies, insuring public and personal safety. The Crisis Intervention Team (CIT) training provides officers with education about mental illness and other behavioral disabilities as well as providing skills and tools for effectively and safely interacting with someone who is experiencing a crisis.

Course Description: Crisis Intervention Team training is an in-depth 40-hour specialized course of study for uniformed patrol law enforcement officers and sworn corrections officers who, in addition to their regular service calls, will be required to respond to crisis calls involving people who have behavioral disabilities. CIT officers will use their acquired knowledge and skill to effectively handle crisis situations and make the most appropriate disposition, which will best serve the individual and the community.

The key components of this course cover the following:

- Officers are exposed to the dynamics of mental illness, developmental disabilities, child and adolescent disorders, elderly individuals with behavioral issues, returning combat veterans, people who have excited delirium, and people with substance abuse/co-occurring disorders. This training will allow officers to make quick and effective decisions utilizing options they have to resolve the crisis.
- Officers are exposed to the experiences, viewpoints and concerns of persons with mental illnesses (consumers). Officers will meet with consumers in order to gain their perspective and learn from them.
- Officers receive instruction and demonstrations in basic listening and responding skills along with crisis interventions strategies. Real life crisis scenarios provided by trained professional actors with the assistance of state-certified CIT officers are presented to officers for them to demonstrate their resolution skills.
- **The scenario based training will take place on Thursday, May 24th, attendees will be required to wear their "department uniform of the day" for their current assignment.**

About the Instructors: The course will be conducted by a diverse group of law enforcement and behavioral health professionals, including active CIT officers from various parts of the State of Illinois. An essential part of the CIT course is scenario-based skills training with crisis scenarios provided by trained professional actors. All scenarios are facilitated and evaluated by certified CIT officers.

1050 West Romeo Road (at Sunset Pointe Drive); Romeoville, IL 60446

Thursday & Friday; May 24 & 25, 2018

8:00 am till 4:00 pm

This course complies with the guidelines of the following mandate(s): Pending

Course Description:

Day 1 of the CDR Technician course exposes the CDR System user to the basic functions of the Bosch CDR system so that, at a minimum, the user can confidently image data from supported vehicles using the standard On-Board Diagnostic (OBD II) Data Link Connector (DLC) port and, in most cases, directly from the airbag control module (ACM).

Day 2 of the CDR Technician training is a hands-on extension of what was learned on day 1 and offers small-group guided instruction in:

- On-Board Diagnostic (OBD-II) Data Link Connector (DLC) data imaging
- Module location and identification with direct-to-module data imaging
- Practical booster and adaptor applications
- "Back powering" vehicle systems to enable DLC data imaging

CDR has updated and changed the way the Bosch preferred CDR training courses are presented, and certified Bosch-CDR Trainer/Mentors instruct the class and are eligible to obtain official CDR Technician certificates. Upon completion of this class, the user should be able to confidently image relevant crash data from supported motor vehicles.

All students need to bring a laptop computer or other device with a USB port to the class.

Student reference materials will be distributed in USB flash drives (files will accept electronic comments and highlighting and can be saved).

Successful completion of the CDR Technician class is a required prerequisite for both the Advanced Skills for the CDR System Operator course and the CDR Data Analyst course.

Instructor (s): Course instructor(s) are provided by *NUCPS*.

Emphasis will be placed on the tenets of DUI enforcement not covered in basic training. Officers will also be provided with the genesis and motivation for techniques, procedures, and law currently used in DUI enforcement.

Pharmacology and physiology will be discussed in order to enhance officers' knowledge of the effects of alcohol/drugs on the human body. Eye examinations will focus on the dynamics of pupillary reaction to stimuli related to possible impairment caused by alcohol/drugs.

This course will not train officers in field testing per se, but will review common mistakes made by officers when conducting such tests, thus enabling officers to avoid future defense challenges. This course will emphasize the eight implied consent warnings and the statutory elements required for enforcement. The final portion of the program will focus on the chemical testing of breath, blood, and urine. Relevant court cases will be highlighted throughout the training.

Topics to be addressed include:

- Review of NHTSA curricula
- Pharmacology and physiology of alcohol on the human body and pharmacokinetics utilizing Widmark's formulas
- Retrograde extrapolation
- The three phases of the DUI process as described by NHTSA
- Common errors associated with Standardized Field Sobriety tests (SFST's) and other non-standardized tests
- Eye exams conducted during DUI encounters and the pupillary dynamics of possible alcohol and/or drug impairment
- Approved Preliminary Breath Test instruments that have automatic sampling/self-diagnostics and the administrative rules governing their use
- The 8 Implied Consent Warnings and the statutory elements associated with their use
- Evidential chemical tests an officer may request after a DUI arrest and the administrative rules associated with each test

Instructor: Tony Lebron (Retired M/Sgt; Illinois State Police) will be the instructor.

Content includes the use of IVC violations for probable cause stops, bail bond procedures for multiple offense and out-of-state violators, and equipment and safety and enforcement issues.

Attendees will participate in table-top exercises in the morning and afternoon sessions. These exercises will help officers understand the subtle differences in the subsections of offenses (e.g.: turning, U turns, sign violations). Attendees will also examine the differences between business, petty, and serious IVC offenses. Attendees will:

- Learn the application of the "hands free" electronic communication device law
 - what is allowed while holding the device (speed dialing, etc)
- Review
 - New laws
 - Changes to existing laws
- Review current violations from commonly used IVC chapters
- Cover the new bond procedure for petty traffic offenses effective 01/01/2015
- Learn how to recognize vehicles which are *hazardous dilapidated motor vehicles*
 - when a vehicle can be towed by law enforcement from private property
- DUI enforcement laws
 - BAID
 - MDDP
 - Felony violations
- Review less commonly used, probable cause-based sections
- Learn proper application of IVC registration sections to out-of-state violators
- Review current court case law affecting application of the IVC

Continued on next page:

- Learn proper application and use of IVC sections for similar offenses
 - e.g.: charging too fast for conditions instead of speeding
- Review towing statutes and court rulings about vehicle towing
- Learn graduated license enforcement
- Review child safety seat enforcement

This course is appropriate for patrol and traffic enforcement officers (local, county, state), and their supervisors.

Instructor: H. Michael Drumm, D.P.A, will conduct the course. Dr. Drumm is president of Drumm & Associates, Ltd. He has more than 37 years of IVC enforcement experience, and is currently a member of the Monee Police Department. Drumm is an ITOA and ILEETA member, and is certified as an instructor with the Illinois Law Enforcement Training and Standards Board. Drumm is also an approved instructor for the Department of Homeland Security, and an adjunct instructor at the Police Training Institute at the University of Illinois and the Suburban Law Enforcement Academy (SLEA) at the College of DuPage (IL).
