The Reid Technique of Interviewing and Interrogation®

Frankfort Police Department,

20602 Lincoln Way Lane, Frankfort, IL 60423

Monday, Tuesday & Wednesday; December 4, 5 & 6, 2017

8:00 am till 3:00 pm

This course complies with the guidelines of the following mandate(s):

Civil Rights | Constitutional & Proper Use of LE Authority | Lead Homicide Investigator | Legal Updates

Course Description: This is a twenty-one hour program on the Reid Technique of Interviewing and Interrogation®. The course includes; interview and interrogation preparation, behavior symptoms, the Reid® Behavior Analysis Interview (B.A.I.) and "The Reid Nine Steps of Interrogation" which include:

Interview and Interrogation Preparation

The style, appearance and approach of the successful interviewer and interrogator will be covered, as will the room settings conducive to these activities.

Behavior Symptoms

Differences in verbal and nonverbal behavior between innocent and deceptive persons often can be observed, and are thus indicative of whether or not a suspect is telling the truth. A guilty suspect makes a conscious decision to resist your effort to get at the truth. In trying to maintain a structure of verbal lies, however, that suspect most often develops internal conflicts and tensions which manifest themselves in nonverbal behavior. Thus, body movements, facial expressions, eye contact, attitudes, posture and grooming gestures can indicate whether the subject is telling the truth or lying. Nonverbal indicators can also be used to determine whether the suspect under interrogation is listening, maintaining a defiant attitude or is ready to confess. You will learn how to observe and assess critical behavior symptoms and use those assessments to determine whether to move on to the next step of the interrogation.

Reid® Behavioral Analysis Interview (B.A.I.)

The information developed through use of the standard investigative questions of "who," "what," "when" and "how" is often not adequate — even in combination with physical evidence — to identify the wrongdoer. The Reid Behavioral Analysis Interview is a technique that uses a structured set of non-accusatory behavior-provoking questions developed as a result of many thousands of interviews. The B.A.I. makes it easier to determine whether the suspect is telling the truth about involvement in the matter under investigation, and is flexible enough to be used in cases ranging from employee theft to homicide.

The Reid Nine Steps of Interrogation®

The nine step approach to a successful interrogation has been developed by John E. Reid and Associates through extensive research and practical experience over a period of 60 years. Because of the subject's importance, approximately half the classroom time in the seminar is devoted to the interrogation process and detailed examination of each of the nine steps.

John Reid and Associates will provide the instructor for this class.

PPCT Defensive Tactics Instructor School

Plainfield Police Department
14300 Coil Plus Drive, Plainfield, IL 60544
Monday – Friday; December 4 - 8, 2017
8:00 am till 4:00 pm

This course complies with the guidelines of the following mandate(s):
Law Update | Procedural Justice

Course Description:

The PPCT Defensive Tactics System is the first subject control system developed through tactical, legal and medical research. Tactically, the system addresses the most common types of resistance officers encounter, allowing the instructor to maximize training on job related techniques. Legally, the PPCT System teaches a simple use of force continuum that clarifies the appropriate force level for every level of resistance. Medical research was conducted on every PPCT technique to refine technique efficiency and to ensure the medical implications were proportional to the level of resistance.

Course Goals:

1. To examine survival learning research in an effort to enhance survivability in combat situations.
2. To instruct a subject control system that is compatible with the effects of survival stress.
3. To teach a subject control system based upon the four most common types of resistance.
4. To refine student technique to the instructor level.
5. To teach instructional methods designed to enhance a student's ability to learn survival techniques, increase his/her confidence level, and assist in the successful application of physical techniques.

Course Topics:

Use of Force Human Factors

This chapter examines survival stress research and provides students with information that will enhance their survivability in combative situations and recommendations regarding issues related to critical incident management.

Continued on next page:

Instructor Development and Training Protocols

This chapter reviews instructional methods designed to enhance a student's ability to learn survival techniques, increase his/her confidence level, and assist in the successful application of physical techniques. Topics covered include the psychology of survival training, motivational factors for learning survival skills, the neural basis of learning, and the stimulus response training principle. This chapter also introduces PPCT training protocols, including certification procedures, course protocols and registration requirements, and classroom safety concerns.

PPCT Control Principles

This chapter introduces the basic training principles that form the foundation on which all PPCT training systems are based. Topics discussed include components of acceptability, the PPCT Resistance/Control Continuum, common types of resistance, principles of controlling resistive behavior, survival reaction time, the reactionary gap, and tactical positioning.

PPCT Tactical Handcuffing System

This chapter presents the PPCT Tactical Handcuffing System, a highly effective process that emphasizes a "commonality of technique" for application from the various handcuffing positions. Also discussed are the types of subjects students will encounter, the proper handcuffing grip, tactical considerations, handcuffing liability, handcuffing myths, and handcuff selection and maintenance.

Escort Position and Joint Lock Control

This chapter provides students with the skills and knowledge required to control escort position resistance and teaches techniques for follow-up control. It examines the escort position, the most common forms of escort position resistance, joint locks, and follow-up control techniques.

Pressure Point Control Tactics

This chapter teaches students how to effectively and justifiably utilize pressure point control tactics for subject control. Topics include methods of application, nerve pressure point and nerve motor point locations, and use of force considerations.

Defensive Counterstrikes

The defensive counterstrike chapter provides students with the skills and knowledge required to not only determine when it is appropriate to strike a subject, but to deliver the strike effectively as well. Topics include the tactical methodology of PPCT counterstrikes, the Fluid Shockwave Principle of striking, defensive stances and blocks, and counterstrikes with the hands and legs.

PPCT Shoulder Pin Restraint System

This chapter introduces the PPCT Shoulder Pin Restraint System as an alternative to the traditional bilateral neck restraint, pursuant to PPCT's goal of simplifying all aspects of training by utilizing gross motor skills. A highly versatile technique, the PPCT Shoulder Pin Restraint can be used as a low-level restraint to pin a subject to the ground, or it can be used to render a subject unconscious in incidents of high-level resistance. The chapter discusses the different types of neck restraints, the physiological factors of vascular restraints, technical aspects of the Shoulder Pin technique, and force considerations.

PPCT Impact Weapon System

This chapter presents the PPCT Impact Weapon System, a highly effective process that targets the PPCT nerve motor points. It examines the advantages and disadvantages of collapsible batons, legal considerations of the PPCT nerve motor point system, the Fluid Shockwave Principle of striking, and blocking and striking techniques of the system.

PPCT Weapon Retention and Disarming System

This chapter examines the PPCT Weapon Retention and Disarming System, a simple system based on gross motor skills. It examines the issues a student needs to consider in preparing mentally and physically to disarm an assailant and the basic steps in the PPCT retention and disarming procedures.

John Reid Advanced Interviews & Interrogations

Thursday, December 7, 2017
8:00 am to 3:00 pm

This course complies with the guidelines of the following mandate(s):
Civil Rights | Constitutional & Proper Use of LE Authority | Lead Homicide Investigator | Legal Updates

Course Description: This course is for individuals who have completed the 3-day seminar on *The Reid Technique of Interviewing and Interrogation*, and builds upon their knowledge of the Reid Technique.

Most unsuccessful interrogations are a result of the investigator's inability to move the guilty suspect from one stage of the interrogation to the other. *Reid* has defined three distinct stages of the interrogation that may give the investigator problems:

1. Defiant stage: seven proven tactics to move suspects out of this stage
2. Neutral stage: four proven techniques to get the suspect to listen to the interrogator's themes
3. Acceptance stage: three specific techniques that will dramatically increase admissions of guilt

People who commit crimes do so to fulfill certain needs. What needs were satisfied is based upon the case facts, evidence and results of the interview — types of needs that will be thoroughly discussed are:

- Real need crimes
- Impulse need crimes
- Esteem need crimes
- Lifestyle need crimes

The Advanced Seminar will also address the following specific problem areas for some but not all interrogations:

- Juvenile interrogations
- Interrogation regarding guilty knowledge
- Playing one suspect against another
- Interrogation on multiple crimes
